H. J. G. GUNDERSEN	D. C. JOY

Journal Executive Secretary: ANNE RALPH

Administrator: P. G. FLEMING

Contents of Vol. 116

Part 1

MICROSCOPY OF VOIDS AND INTERFACES

Introduction	1
W. M. STOBBS. Electron microscopical techniques for the observation of cavities	3
E. JOHNSON, E. KYNDE and L. T. CHADDERTON. Contrast in transmission electron micrographs of void arrays in crystals	15
H. E. EXNER. An introduction to the development and effects of voids in sintered materials	25
I. C. ELLIOTT and B. WILSHIRE. Microscopy of voiding during creep of alpha-brass	39
TERENCE G. LANGDON. A microscopic examination of void formation in superplastic materials	47
S. K. TYLER and P. J. GOODHEW. Irregular helium bubbles in niobium alloys	55
T. LAURITZEN, G. M. KONZE, W. L. BELL and W. K. APPLEBY. Depth distribution of swelling in ion-bombarded stainless steels	65
E. JOHNSON, T. WOHLBERG, W. A. GRANT, P. HANSEN and L. T. CHADDERTON. TEM study of amorphous alloys produced by ion implantation	77
J. P. F. LEVITT and A. HOWIE. The imaging of surface step structures by dark field electron microscopy	89
A. P. SUTTON, D. A. SMITH and V. VITEK. An atomistic study of the structure of grain boundary dislocations	97
R. C. POND. The measurement of excess volume at grain boundaries using transmission electron microscopy	105
G. L. DUNLOP, J.-O. NILSSON and P. R. HOWELL. Interaction of grain boundary dislocations with precipitates during high temperature creep	115
CAMPBELL LAIRD and RAMANATHAN SANKARAN. The structure of interphase boundaries in solids	123
ROGER C. ECOB, JOHN V. BEE and BRIAN RALPH. Some microstructural observations of transformations in a copper-titanium alloy	141
P. R. HOWELL, P. D. SOUTHWICK and R. W. K. HONEYCOMBE. The austenite/ferrite interface in a duplex alloy steel: structure and associated diffraction effects	151
N. W. JEPPE and T. F. PAGE. Electron microscopy of interfaces between transforming polytypes in silicon carbide	159

Part 2

P. KUČERA, Y. DE RIBAUPIERRE and F. DE RIBAUPIERRE. Computer-controlled double-beam scanning microspectrophotometry for rapid microscopic image reconstructions	173
G. C. SCHOFIELD and N. G. M. WREFORD. Microspectrofluorometric studies on the formaldehyde-induced reaction product of 5-hydroxytryptamine	185
A. GRECO, D. JEULIN and J. SERRA. The use of the texture analyser to study sinter structure: application to the morphology of calcium ferrites encountered in basic sinters of rich iron ores	199
DIANA M. R. HARVEY, T. J. FLOWERS and J. L. HALL. Precipitation procedures for sodium, potassium and chloride localization in leaf cells of the halophyte <i>Suaeda maritima</i>	213
C. D. GARLAND, ADRIAN LEE and M. R. DICKSON. The preservation of surface-associated micro-organisms prepared for scanning electron microscopy	227
J. A. MERRIMAN, M. L. NIELAND and R. J. WEDMORE. Guinea-pig keratinocytes and melanocytes in tissue culture: scanning, transmission and high voltage electron microscope observations	243
WALTER J. HUMPHREYS and WILLIAM G. HENK. Ultrastructure of cell organelles by scanning electron microscopy of thick sections surface-etched by an oxygen plasma	255
 <i>Short Technical Notes</i>	
FRANCIS A. WILLIAMSON. A device for the reproducible spreading of cryo-ultramicrotome sections	265
A. C. G. BEST. A stereoscopic method of viewing internal structures in resin-embedded biological specimens	271
PAUL A. STAGNO and DAVID J. FRIEDENBACH. A tilt-stage designed for light microscopic stereoscopy	275
KENNETH M. TOWE. Electron micrographs of metal shadowed materials: a simple technique for making negative prints	281
D. S. ELLIS and SUSAN STAMFORD. A simple vacuum pipette for processing groups of specimens for electron microscopy	285
R. G. NAGELE, M. M. GOLDSTEIN and H. LEE. A method for preparing and handling cross-sections from early chick embryos for scanning electron microscopy	287
Book Reviews	291

Part 3

MICROSCOPE PHOTOMETRY

Introduction	293
HORST PILLER. Domains of microscope photometry in materials science	295
K. LANGER and K. R. FRENTROP. Automated microscope-absorption-spectrophotometry of rock-forming minerals in the range $40,000\text{--}5000\text{ cm}^{-1}$ (250–2000 nm)	311
G. J. PITT and K. M. DAWSON. Some considerations involved in the automation of reflectance measurement on coal	321
B. M. ENGLAND, R. A. MIKKA and E. J. BAGNALL. Petrographic characterization of coal using automatic image analysis	329
G. KHAVARI-KHORASANI, H. E. BLAYDEN and D. G. MURCHISON. Microscope photometry in studies of the molecular structure of carbonized bitumens and pyrobitumens	337
DIETRICH MOSSAKOWSKI. Reflection measurements used in the analysis of structural colours of beetles	351
HANS-GEORG ZIMMER. Digital picture analysis in microphotometry of biological materials	365
SIEGFRIED WITTE. Microphotometric techniques in intravital microcirculatory studies	373
H. W. TIFFE, K. H. MATZKE and G. THIESSEN. Spectral changes of the fluorescent acriflavine-(Feulgen) DNA dye complex at different temperatures: application of a new cryostat for measurements in reflected and transmitted light	385
K. H. MATZKE, G. THIESSEN and H. W. TIFFE. The evaluation of cell nuclei staining parameters regarding the reproducibility of fluorescence measurements	391

Index of subjects

- Acriflavine-(Feulgen) DNA dye complex, spectral changes in, 385
- Alloy, amorphous, produced by ion implantation, 77
- copper-titanium, observations of transformations in, 141
- niobium, irregular helium bubbles in, 55
- Alpha-brass, creep of, 39
- Analyser, texture, study of sinter structure, 199
- Automatic image analysis, petrographic characteristics of coal, 329
- Automated microscope-absorption-spectrophotometry, 311
- Automation of reflection measurement in coal, 321
- Beetles, structural colours of, reflection measurements for, 351
- Bitumens, carbonized, and pyrobitumens, molecular structure of, 337
- Bubbles, helium, in niobium alloys, 55
- Cavities, EM techniques for observation of, 3
- Cells, leaf, precipitation procedures for localization of sodium, potassium and chloride in, 213
- Cell nuclei, staining parameters, 391
- Chloride, precipitation procedures for, 213
- Coal, automation of reflection measurements in, 321
- Petrographic characterization, using automatic image analysis, 329
- Computer-controlled double-beam scanning microspectrophotometry, 173
- Creep of alpha-brass, voiding during, 39
- Creep, high temperature, interaction of dislocations with precipitates, during, 115
- Cross-sections, method to prepare and handle, 287
- Cryostat, new, measurements in reflected and transmitted light, 385
- Cryo-ultramicrotome sections, device for reproducible spreading of, 265
- Crystals, void arrays in, 15
- Dark-field electron microscopy, imaging of surface step structures, 89
- Depth distribution of swelling in stainless steels, 65
- Digital picture analysis in microphotometry, 365
- Dislocations, grain boundary, structure of, 97
- interaction of, with precipitates, 115
- Domains of microscope photometry, 295
- Double-beam, computer-controlled microspectrophotometry, 173
- DNA dye complex, new cryostat, 385
- Electron microscopy, cavities, observation of, 3
- micrographs of metal-shadowed materials, making negative prints, 281
- vacuum pipette to process groups of specimens, 285
- Embryos, early chick, method to prepare cross-sections, 287
- Ferrites, calcium, morphology of, in sinter of rich iron ores, 199
- Fluorescence measurements, reproducibility of, 391
- Formaldehyde-induced reaction product, 185
- Grain boundary dislocations, atomistic study of structure, 97
- interaction of, with precipitates, 115
- Grain boundary, measurement of excess volume at 105
- Helium bubbles, irregular, in niobium alloys, 55
- High voltage electron microscopy, observations in tissue culture, 243
- 5-hydroxytryptamine, reaction product of, 185
- Image reconstruction, rapid microscopic, 173
- Interface, austenite/ferrite in a duplex alloy steel, 151
- Interfaces, EM of, in silicon carbide, 159
- Intravital microcirculatory studies, microphotometric techniques in, 373
- Ion-bombarded stainless steels, 65
- Ion implantation, amorphous alloys, produced by, 77
- Iron ores, rich, texture analyser to study sinter structure, 199
- Keratinocytes in tissue culture, 243
- Light microscopic stereoscopy, tilt stage for, 275
- Light, reflected and transmitted, cryostat for measurements in, 385
- Melanocytes, in tissue culture, 243
- Metal-shadowed materials, electron micrographs of, 281
- Micro-organisms, preservation of, 227
- Microphotometric techniques in intravital microcirculatory studies, 373
- Microscope-absorption-spectrophotometry, automated, 311
- Microscope photometry, digital picture analysis, 365
- domains in materials science, 295
- molecular structure of bitumens and pyrobitumens, 337

- Microspectrofluorometric studies, 185
- Microspectrophotometry for rapid image reconstructions, 173
- Minerals, rock-forming, automated absorption-spectrophotometry, 311
- Negative prints, simple technique to make, 281
- Niobium alloy, bubbles in, 55
- Organelles, cell, ultrastructure of, 255
- Pipette, vacuum, to process groups of specimens, 285
- Plasma, oxygen, SEM of thick sections surface etched by, 285
- Polytypes, transforming, in silicon carbide, 159
- Potassium, precipitation procedures for localization of, 213
- Precipitation procedures for locating sodium, potassium and chloride, 213
- Pyrobitumens, molecular structure of, 337
- Reflection measurement of coal, 321
- Reflection measurement analysis of structural colours of beetles, 351
- Resin-embedded biological specimens, method to view internal structure, 271
- Scanning electron microscopy,
 - Cross-sections, method to prepare and handle, 287
 - preservation of surface-associated microorganisms, 227
 - tissue culture, observation of, 243
 - ultrastructure of cell organelles, 255
- Silicon carbide, transforming polytypes in 159
- Sintered materials, voids in, 25
- Sinter structure, use of texture analyser, 199
- Sodium, precipitation procedures for localization of, 213
- Spreading, reproducible, device for, 265
- Stage, tilt, for light microscopic stereoscopy, 275
- Staining parameters, evaluation of cell nuclei, 391
- Stainless steels, depth distribution of swelling in, 65
- Steel, duplex alloy, austenite/ferrite interface in, 151
- Stereoscopic method of viewing internal structures, 271
- Stereoscopy, light microscopic, tilt stage for, 275
- Surface-etched thick specimens, by an oxygen plasma, 255
- Surface step structures, image of, by dark field EM, 89
- Superplastic material, examination of void formation in, 47
- Transformations in a copper-titanium alloy, 141
- Transmission electron microscopy,
 - amorphous alloy, produced by ion implantation, 77
 - contrast in micrographs of void arrays, 15
 - grain boundaries, measurement of excess volume, 105
 - tissue culture, observation of, 243
- Void arrays in crystals, 15
- Void formations in superplastic materials, 47
- Voids in sintered materials, 25
- Voiding during creep of alpha-brass, 39
